### DETAILED ACTION

1. This office action is in response to Applicant's amendment filed on 18 November 2005.

#### *Election/Restrictions*

2. This application contains claims directed to the following patentably distinct species:

- I. Claims 1-9 and 14-16, directed to a method of binding a stack of sheets using pressure sensitive and hot melt adhesive.
- II. Claims 10-12, directed to an apparatus for use in binding a stack of sheets using only pressure sensitive adhesive.
- III. Claims 13 and 17, directed to a method and apparatus for binding a stack of sheets using only hot melt adhesive.

The species are independent or distinct because Species II and III do not require the use of both pressure sensitive and hot melt adhesive as required by Species I.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Art Unit: 3722

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the

Art Unit: 3722

record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

### ***Response to Arguments***

4. Applicant's arguments with respect to claims 1-13 have been considered but are moot in view of the election of species requirement.

### ***Conclusion***
